

ATV TIPPING TRAILER, 1.5 TONNES

23-TV15ATV

Tipping trailer for quads/ATVs with powerful bogie and 1.5 tonne load capacity

Strong galvanised construction, generous dimensions and bogie with sturdy cross-country wheels make this trailer the unbeatable workhorse in our range.

Fixed front stem with raised grid to protect against load movement, extruded flaps for strength, easily detachable fold-down side flaps, hanging tailgate with the option of restricting flap opening with a chain for spreading gravel etc.

The tailgate can easily be detached, as can the rear corner posts, giving a clear floor if required. Strong all-round trailer locks hold the flaps in place, metal-covered floor makes the trailer robust and suitable for tough driving, tipping with the aid of the ATV's rear winch.

Rotatable 50 mm ball coupling for your safety, 1500 kg loading capacity for tough jobs and a value-for-money price - a workhorse from Kellfri.

Extension sides available as accessories.

Requires some customer assembly.

TECHNICAL DATA

Width	1330 mm
Floor length	2010 mm
